The Legal Route

To The Commercial Appeal:

I would like to suggest a viewpoint, in opposition to some of your recent editorials and the constant urgings of city hall to support the Supreme Court decision (and reactions of three successive secretaries of transportation) to find an acceptable alternate to the routing of I-4 through Overton Park. Couldn't there be a message there which is legitimately supported under the guise of "law and order"?

If the engineers were given a clear cut mandate to honor that one decision, I am confident they could coordinate the plans at reasonable cost for the future peace, progress and betterment of our growing city. Let's allow Memphis to make progress on all fronts.
