

CHEMISTRY 111 GENERAL CHEMISTRY I

Fall, 2000 - B Hour

Dr. Bradford D. Pendley

Office: 411 Kennedy Hall

Phone: 843-3959 (o); 757-9426 (h)

Email: pendley@rhodes.edu

DESCRIPTION: In this course, you will study several of the fundamental principles that define chemistry by exploring the composition, structure, properties and reactivity of matter. You will focus most of your attention on inorganic compounds, but the underlying ideas in the models of bonding and reactivity that we will discuss are applicable to most compounds. At the completion of the class, you should have a solid introduction to the models that scientists use to explain the observed composition, structure and reactivity of matter, and should be able to apply these models to help you predict such properties.

GOALS: To be successful in this course, the goals that you should work towards are;

1. Acquiring knowledge about the composition, structure, properties and reactivity of a variety of chemical substances;
2. Understanding some of the models that scientists use to explain the observed the composition, structure, properties and reactivity of matter;
3. Demonstrating an ability to apply your knowledge of the composition, structure, properties and reactivity of matter appropriately.

TEXT: *Essentials of General Chemistry*, 10th ed., by Robinson, Odom, and Holtzclaw.

EVALUATION: In this course, you will be evaluated on your ability to demonstrate your knowledge and understanding of chemistry as well as your ability to apply your knowledge and understanding to analyze and solve qualitative and quantitative problems. There will be four examinations and one comprehensive final examination during the semester. Each of the four exams as well as the final exam will count 200 points.

The total number of points you attained on these exams determines your final grade.

<u>Grade</u>	<u>Total points</u>
A	900-1000
B	800-899
C	700-799
D	500-699
F	below 500

Plus and minus assignments will be made approximately within these ranges.

POLICIES: Your attendance and participation at every class meeting is expected. In instances in which an absence is unavoidable, please contact me promptly. If you are unable to attend a class, all material discussed and assignments given are your responsibility.

There will be regularly assigned readings and problem sets. None of these assignments are graded; they are for your benefit only. We will frequently discuss these readings and problem sets during class, and I will expect your input. These assignments are the minimum I believe is necessary for an average student to understand the subject material.

You will be allowed to make up a missed exam with an excused absence. If at all possible, please let me know ahead of time if you are not able to take an exam at its scheduled time so that we can arrange another time for you to take it. If the absence is not excused, you will receive zero points for the exam. Your exams and other work specified must be pledged to be your own.

SCHEDULE

<u>Day/date</u>	<u>Topic(s)</u>	<u>Chapter(s)</u>
W 8/23	Course overview, expectations	
F 8/25	Introductory concepts	1
M 8/28	Atomic Theory, compounds, nomenclature, equations	2
W 8/30	Atomic Theory, compounds, nomenclature, equations	2
F 9/1	Atomic Theory, compounds, nomenclature, equations	2
W 9/6	Atomic Theory, compounds, nomenclature, equations	2
F 9/8	Atomic structure, spectra, properties	5
M 9/11	Atomic structure, spectra, properties	5
W 9/13	Atomic structure, spectra, properties	5
F 9/15	Atomic structure, spectra, properties	5
M 9/18	Atomic structure, spectra, properties	5
W 9/20	EXAM I	
F 9/22	Chemical stoichiometry	3
M 9/25	Chemical stoichiometry	3
W 9/27	Chemical stoichiometry	3
F 9/29	Chemical stoichiometry	3
M 10/2	Chemical stoichiometry	3
W 10/4	Thermochemistry	4
F 10/6	Thermochemistry	4
M 10/9	Thermochemistry	4
W 10/11	Thermochemistry	4
F 10/13	EXAM II	
W 10/18	Chemical bonding	6
F 10/20	Chemical bonding	6
M 10/23	Chemical bonding	6
W 10/25	Chemical bonding: Molecular Orbital Theory	7
F 10/27	Chemical bonding: Molecular Orbital Theory	7
M 10/30	Molecular structure	7
W 11/1	Molecular structure	7
F 11/3	Molecular structure	7
M 11/6	Molecular structure	7
W 11/8	EXAM III	

F	11/10	Chemical reactions and the Periodic Table	8
M	11/13	Chemical reactions and the Periodic Table	8
W	11/15	Chemical reactions and the Periodic Table	8
F	11/17	Chemical reactions: The descriptive metals	21
M	11/20	Chemical reactions: The descriptive metals	21
M	11/27	Chemical reactions: The semi-metals and nonmetals	22
W	11/29	Chemical reactions: The semi-metals and nonmetals	22
F	12/1	EXAM IV	
M	12/4	Gases	10
W	12/6	Gases	10

LABORATORY: The laboratory component of this course will begin the second week of classes (the week of August 28) at the regularly scheduled times in Room 301 or 308 (for Dr. Pendley's Tuesday and Thursday 111 labs) Kennedy. Laboratory manuals and notebooks will be available at the beginning of the first laboratory period and will cost \$8.00.
