

Priority Sought On Expressway Across Mid-City

Downtown Association Asks Immediate Action On East-West Route

NOW LAST IN PLANNING

Unanimous Resolution Sent To Commission — Talks With Farris Moulton Are Expected Next Week

By JAY HALL
The Downtown Association yesterday strongly urged that "immediate priority" be given construction of the east-west expressway leg which would run through the middle of the city. A resolution to this effect was unanimously backed by members of the influential downtown group. Copies were sent to each member of the City Commission and should reach their desks today.

A meeting to discuss east-west plans is scheduled next week by representatives of the Downtown Association with William W. Farris, public works commissioner, and his engineers. State Highway Commissioner B. ...

Now Last In Priority

An exact meeting date, however, has not been set. The meeting agreement, not an acknowledgment of responsibility, was made after a four-day intensive series last week. City officials reported the east-west leg at present is in the priority list. Some expressway legs are already under construction but all along the city's periphery. Building an east-west expressway has been pictured as ...

Desires Is Lacked

The Downtown Association has expressed its interest in the expressway project with particular emphasis on the east-west leg. The association's president, ...

Polar 'Satellite' May Be Casing Of Discoverer

By The Associated Press

COLUMBUS, Ohio, Feb. 11.—The mystery satellite on earth's polar orbit probably is a casing of an early United States Discoverer, Secretary of the Air Force Dudley Sharp told newsmen Thursday.

Sharp said he based his guess on the close comparison between the size of the casing of the Discoverer series satellites and the dark object which emits no radio waves.

Sharp said the casing of the Discoverer—the most successful of all United States missiles—measures 19.2 feet in length. Radio telescope observers have estimated the length of the mystery satellite at 19 feet. This close comparison, Secretary Sharp said, would indicate that the dark missile is of United States origin.

Sharp told newsmen he had no information that Russia has launched a recent missile and, he added, most Russian missiles apparently have been larger than the object now in the polar orbit.

First National Looking Ahead

Bank Has Option To Acquire Downtown Properties For Expansion

By MARY McLELL

The First National Bank is investing \$750,000 in the future growth of downtown Memphis. After Morgan, president, yesterday announced the bank has taken option to purchase the entire quarter block at the northwest corner of Third and Monroe, plus one-eighth block on Madison from the Foundation Institute Building west to the alley.

Growth Anticipated

"We have immediate plans for use of the property," Morgan said. "The building is being planned to meet the growing needs of the downtown area. The property is being purchased to provide for the expansion of the bank's downtown branch."

All new plans to assist

The property has been handled by Snowden, Boyer, Carter, Carr and Robert E. Horrell. Boyer is vice president of the bank and Henry ...

Acquire Is Traded

The bank's Morgan revealed, already has acquired one portion of the property, a building directly back of the Federal Reserve Bank. The bank is trading \$100,000 of its ...
