Racial Arrogance Is Root Of War, Labor Union Told

MALAYSIA — The war in Asia is not merely a fight between dictatorships and democracy. It is also a defense against those who have been robbed and terrorized because of color and place of birth and those who have done them the ridding,” Walter White, executive secretary of the National Association for the Advancement of Colored People, told delegates attending the second annual convention of the International Union of Electrical Workers, CIO, here last week.

Citing the "racial arrogance" of white Americans and Europeans and their exploitation of underprivileged areas, Mr. White said, "Above all, the war is a war to which the present rulers of China to believe — no opinion quite accurately — that their lot would be better served under Soviet instead of democratic control."

"I am convinced," the NAACP official continued, "that our greatest effort is not calculated prejudice against others, except on the part of a minority of Americans who join such organizations as the Council on Foreign Relations, the ultra-conservative business interests which finance and support the groups who generally believe that lives fault has been lived and consummated, for the rest of the world. Particularly, the dark world of twofoldness in the sake of their nation and the people of the world, it is this indifference or apathy which is so much of what is demanded of our national security and for our great country."
Sum Announced For Three Dental Research Grants
